

The
Metropolitan Waterworks Museum
Welcomes

Dr. Robert J. Allison

Professor and Chair, Department of History
Suffolk University

Aesthetics and Engineering:
Form and Function at the Metropolitan Waterworks

Noted Boston historian Robert J. Allison will discuss how the massive Waterworks projects were driven by practical purpose, but also embodied, as part of their function, the creation of a civic amenity seemingly unrelated their basic function. In some cases, form did not follow function -- which may be the reason we find places like the Waterworks more aesthetically appealing than places like the new Boston City Hall.

May 27, 2015 at 7pm

Open to the Public – No Admission Fee

Metropolitan Waterworks Museum Overlook Gallery

Take Green Line "C" Train to Cleveland Circle or
Green Line "D" Train to Reservoir
Bus Routes 51 and 86 to Reservoir
